# MOBILECONNECT

ENTERPRISE VIDEO THAT  
MOVES WITH YOU

POWERED BY:

■ **BUILT FOR CAMERAS ON THE MOVE**

MobileConnect connects modern cloud video platforms with vehicles and mobile assets. Whether installed on trains, aircraft, buses, boats, service vehicles, or construction equipment, MobileConnect enables reliable video monitoring for environments where traditional infrastructure isn't practical.

■ **POWERED BY CLOUD VIDEO DESIGNED FOR MOBILITY**

Mobile environments benefit from the flexibility of cloud video systems. MobileConnect leverages cloud platforms that are optimized for cellular connectivity, allowing organizations to deploy the latest camera technology while maintaining reliable video access from anywhere.

■ **REAL-TIME VISIBILITY INTO MOVING ASSETS**

MobileConnect enables security teams to perform live look-ins on cameras mounted to vehicles while they are in motion. With low-latency streaming and intelligent bandwidth management, operators can view real-time activity and maintain situational awareness across fleets and mobile operations.

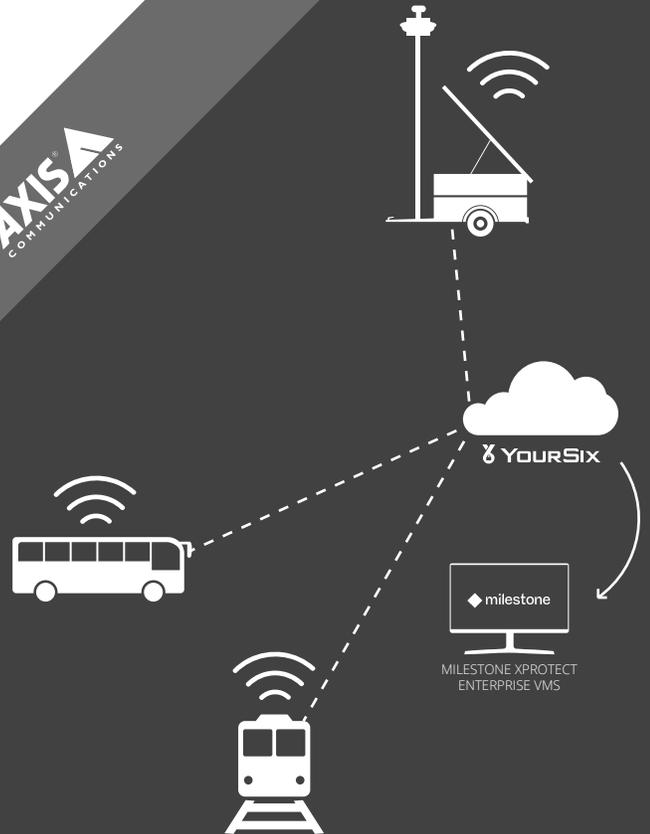

■ **CONNECTING CLOUD VIDEO TO THE ENTERPRISE VMS**

While mobile video often lives in the cloud, many organizations still rely on an enterprise video platform for investigations and operations. MobileConnect bridges cloud video platforms with Milestone XProtect, allowing mobile camera feeds and recorded footage to be accessed alongside traditional surveillance systems.

■ **BUILT FOR SCALABLE FLEET AND MOBILE OPERATIONS**

From small to large fleets, MobileConnect allows organizations to expand mobile video deployments while maintaining centralized visibility and consistent security workflows.
