◆ milestone

■ **BUILT FOR PHYSICAL SECURITY**

StorageConnect is purpose-built for video surveillance and access control, not general IT. We design for continuous recording, fast investigations, reliable databases, and long-term system stability. This is storage engineered for real-world security workloads.

■ **DESIGNED WITH THE INDUSTRY'S LEADING PLATFORMS**

Our close alignment with Milestone, Axis, LenelS2, and Dell allows us to right-size every system. We eliminate waste, avoid overbuilding, and design for growth without sacrificing performance.

■ **READY FOR ON-PREM, HYBRID, & CLOUD**

Whether fully on-site, hybrid, or cloud-forward, StorageConnect is designed to support today's needs while preparing for tomorrow's architecture.

■ **OPTIMIZED FOR HOW SECURITY SYSTEMS ACTUALLY WORK**

It's not about more terabytes — it's about smarter performance. We prioritize video ingest, smooth playback, balanced analytics, and reliable integrations. When it makes sense, we combine video and access control on a single platform to reduce hardware and simplify architecture.

■ **FASTER TO DEPLOY. EASIER TO SUPPORT.**

Standardized builds and Stone-developed system images create consistent, repeatable deployments. That means faster rollout, fewer surprises, and simpler long-term support.

**WHY STORAGECONNECT?**

Better performance. Less waste.  
Faster deployment. Built by experts in physical security.
